

# CATS

The Corporate  
Action Total Solution

With nearly 2 decades of production experience, CATS centralises all aspects of the announcements life cycle into a single workspace, allowing capture, cleansing, tracking, notification, processing and management of ALL phases of the corporate action.

Leveraging the power of Kubernetes, CATS runs in high availability, scalable cloud/container infrastructure(s) and is compatible with Google Cloud Platform, Microsoft Azure and Amazon's AWS.

CATS is in operation at some of the most established financial organisations in the world. It has proven itself globally for our customers in Germany, India, Japan, The United Kingdom, The United States and The Netherlands.
